

# OUTPUT INSTRUCTION IN C

Friday, 1. July 2022

02:11

`printf()` → Predefined function  
⇒ `printf` is used to print a text on the monitor  
⇒ `printf` is used to print value of a variable or an expression.

Q. write a program to print Hello students on the screen.

```
⇒ #include <stdio.h>
int main()
{
    printf("Hello students")
}
```

Q. How to print value a variable?

```
⇒ int a = 5;
    printf("%d", a);
```

## # FORMAT SPECIFIER

<code>%d</code>	int
<code>%c</code>	char
<code>%f</code>	float
<code>%lf</code>	double
